

Dear **Real Value Products** Trading Partner,

This communication is intended for the IT Manager, Regulatory Manager or the Person In Charge (PIC) at your organization. If you are not the correct person, please forward this to the right person.

The Drug Quality and Security Act (DQSA) came into effect as of January 1st, 2015. Title II of the law, the Drug Supply Chain Security Act (DSCSA), creates tracing, verification and serialization requirements for all drug products across all changes of ownership from manufacturer to dispenser. In our efforts to support compliance, **Real Value Products** has partnered with TraceLink to provide our DSCSA solution.

The TraceLink solution enables the sharing and storing of DSCSA-related information. **Real Value Products** can share the information in one of two ways which are outlined below.

1. TraceLink Web Portal: If you do not currently exchange documents electronically, such as ASNs, you will have access to view the regulatory information by logging into TraceLink. If you already have access to the portal, you will receive an email informing you that you will now be able to see **Real Value Products'** information once they have created a link to your organization.
2. B2B Connectivity: If you are EDI capable, you can be integrated with TraceLink so that you can receive this information through your normal electronic transaction. It is important that if you are already integrated with TraceLink that you complete the form so you will be configured to **Real Value Products'** service as well.

Action Required

If you have not already been in communication with TraceLink about gaining access to the TraceLink portal, please complete the following form which consists of four questions to provide us with key information that we need to begin the process: [Request Portal Access](#). TraceLink will reach out to you within 5 business days upon form submission.

To learn more about the regulation and the TraceLink solution, we have included access to the TraceLink Trading Partner Program Education. The following link will allow you to view webinars about the regulation and portal functionality:

[TraceLink Trading Partner Education Resources](#)

Links to Other Helpful Educational Information:

- A copy of the full law can be found on the U.S. Government Publishing Office site: click [here](#) to view.
- A detailed webcast of the DSCSA regulations and business requirements for the supply chain can also be found [here](#).

Real Value Products looks forward to working with you on this initiative. Should you have any questions, please don't hesitate to contact us.

Best regards,

Juliette Cantu
